THE COMPANY

ANATS S.A., headquartered in Tavros, Attica, was founded in 1982 in Athens and is an innovative company in the healthcare sector. Its activity includes the import, export, manufacture and distribution of high quality and advanced technology medical, hospital, parapharmaceutical and medical device products. The company collaborates with leading logistics and transport companies for the proper storage and safe distribution of the products.

THE VISION

ANATS's central goal is to continuously improve people's quality of life. It provides a wide range of products and services that combine reliability, security and innovation, fully meeting the needs of its customers. The company is a leader in the Greek and international arena, is constantly developing and maintains an upward trajectory.

In this context, it has installed, implemented and maintained a quality management system since 1999, fully compliant with the European directives and standards EN ISO 9001:2015 / EN ISO 13485:2016 / \(\Delta Y8/1348/04. \) It also meets and complies with the requirements of the EN ISO 14001 standards.

THE PRODUCTS

ANATS S.A. is the exclusive representative of international and certified companies such as: BIOCHEMICAL, NISSEI, RAYS, RADIAN, ROMED, I-HEALTH, BORSAM, CORONATION κ .ά.

Main product categories:

- Diagnostic support devices / In Vitro products
- · Consumable health and medical equipment
- Baby ecological products and daily care products
- Medical and hospital equipment
- · Orthopedic items & aids
- Dietary supplements and cosmetic treatment items

The company also manufactures products under its own brands: SAFETY A.T./G, MAC-CHECK ANATS, TERMO SAFETY, TARGET, ANATS Health Products.

THE ACTIVITY

ANATS serves a variety of clients: Public and private sector hospitals Diagnostic centers

Pharmacies, pharmacists' cooperatives, drug stores and pharmaceutical companies

Pharmaceutical distributors and wholesalers of cleaning & hygiene products

Medical and orthopedic stores

Food industries, Super Market, shipping companies

Cosmetics stores and specialized collaboration programs with i Health products

Through exclusive partnerships, the company also serves important international markets.

THE PARTNERS

The creativity and potential of each individual are highly valued. The initiatives of employees and external partners and their free expression are encouraged, promoting an environment of innovation. In this way, the company contributes to creating a safe and quality future for everyone.

ANATS S.A. continues to pioneer in the healthcare sector, combining innovation, quality and reliability. With respect for customers, partners and society, it seeks to create products and services that substantially improve the quality of life. Its commitment to its values and continuous investment in technology and human resources ensure that ANATS will remain a leader in the Greek and international market, building a safe and sustainable future for all.

DEFIBRILLATORS

The RADIAN AED (Heart Guardian) Automated External Defibrillator aids in restoring normal cardiac function in acute heart conditions by conducting an electrocardiogram and, if necessary, delivering an electric shock in the event of sudden cardiac arrest. It offers precise analysis of the patient's physiological state and determines the exact number of electric shocks required, ensuring safety and prompt results.

HEART GUARDIAN HR-701 AED HEART GUARDIAN HR-701 PLUS AED

The Heart Guardian HR-701 Series Automated External Defibrillator is an emergency medical device designed to restore normal heart function in individuals who have lost consciousness due to sudden cardiac arrest. The HR-701 Series automatically detects the heart rhythm of cardiac arrest victims and administers an electric shock to the heart to reinstate its normal rhythm. The HR-701 Plus Defibrillator features a 4.3-inch LCD display.

DEFI 5 S ADULT / CHILD AED

The Meditech Defi 5s Defibrillator is an automated external defibrillator. The storage software enables the AED to receive data transmitted via infrared. This software facilitates the reading and configuration of cardiopulmonary resuscitation waves, the setting of AED language, as well as the reading, analysis, and retrieval of stored data.

BENEHEART C SERIES

Fully Automated External Defibrillator (AED) Sudden cardiac arrest (SCA) represents a predominant cause of mortality globally, with an individual succumbing to this condition every five seconds. Alarmingly, 90% of SCA incidents transpire in public venues, away from medical facilities, which diminishes the opportunity for prompt first aid and frequently leads to fatal consequences. The Mindray BeneHeart C Series defibrillator presents a viable solution for bystanders lacking medical expertise to promptly address SCA occurrences outside of hospital settings. It delivers intelligent, rapid, and robust defibrillation and resuscitation assistance, markedly enhancing the likelihood of successful resuscitation for patients experiencing sudden cardiac arrest.

DEFIBRILLATORS

HeartGuardian HR-501RADIAN Defibrillator

Automatic Defibrillator (available in Greek or English). Automatic self-test conducted once a month. Adult/child switch button. Energy output: 150J±10% (Adult) / 50J±10% (Child). Guidance process featuring LED indicators and voice commands. Dimensions: 223 mm (Width) x 312 mm (Length) x 85 mm (Height). Weight with battery: 2.2 kg. Packaging: 1 unit, box containing 2 units.

REF: 496-05-002 (DEFIBRILLATOR GREEK)
REF: 496-05-001 (DEFIBRILLATOR ENGLISH)

HR-501T RADIAN Training Defibrillator

Training Defibrillator (available in Greek or English). Perfect for instructing personnel in the rescue procedure. Packaging: 1 unit, box of 2 units.

REF: 496-05-003 (DEFIBRILLATOR GREEK) REF: 496-05-000 (DEFIBRILLATOR ENGLISH)

HeartGuardian HR-701 RADIAN Defibrillator

Automatic Defibrillator in four languages. Automatic self-test conducted once a month. Adult/child switch button. Energy output of 150J-250J for adults and 50J for children. Visual guidance provided through LED lights. Dimensions: 222 mm (length) x 280 mm (width) x 75 mm (height). Weight with battery: 2.3 kg. Packaging: one unit per box. with two units per package.

REF: 496-05-006

HeartGuardian HR-701 Plus Defibrillator RADIAN

Automatic Defibrillator in four languages. Automatic self-test conducted once a month. Adult/child switch button. Voice guidance provided. Energy output of 150J-250J for adults and 50J for children. 4.3-inch LCD screen. Dimensions: 222 mm (length) x 280 mm (width) x 75 mm (height). Weight with battery: 2.3 kg. Packaging: one unit per box, with two units per package.

REF: 496-05-004

Defibrillator DEFI 5S MEDITECH

Automatic Defibrillator with a choice of two languages: Greek or English. Function button for adults and children. Daily, weekly, and monthly self-test capabilities. Energy output of 150J – 200J for adults and 50J – 75J for children. Dimensions: 300 mm (length) x 240 mm (width) x 80 mm (height). Weight with battery: 1.9 kg. Packaging: 1 unit per box, with a total of 4 units per box.

REF: 632-05-002

Defibrillator BENE HEART C1A MINDRAY

ResQNavi: evaluates the rescuer's proficiency level and offers intelligent rescue navigation customized for the user. Seamless transition between adult and pediatric patient modes. Pre-connected adult and pediatric electrodes facilitate time savings in emergencies. QShock: Rapid delivery of the first shock (under 8 seconds), enhancing the likelihood of successful defibrillation. Biphasic high energy at 360J for improved outcomes. Durable design - tested for drops from 1.5 meters. IP55 rated for water and dust protection. Packaging: 1 unit, box of 2 units.

5

DEFIBRILLATOR ACCESSORIES

REF: 496-02-001

AED HR-501 battery

Model: BT-303. Battery for defibrillator power supply Non-rechargeable LiMnO2 (DC 12V 4.2A) Dimensions: $60(H) \times 175(W) \times 25(D)$ mm. Packaging: 1 unit.

REF: 496-02-005

AED HR-701 and 701Plus Battery

Lithium manganese dioxide (LiMnO2) battery, 12V DC, 6A, non-rechargeable. Packaging: single unit.

REF: 632-02-002

AED Defi 5s battery

12V, 2800 mAh Li-MnO2 Cell (Non-rechargeable). Package: 1 unit.

REF: 763-02-001

Beneheart Battery

1 x Li-MnO2 battery, 4200 mAh disposable battery. Package: 1 unit.

REF: 763-02-002

BeneHeart C1A Mindray electrode

Electrode pads designed for compatibility with C series defibrillators, suitable for both adults and children. One pair of electrodes. Model - MR62. Packaging: 1 unit.

REF: 632-02-003 (ADULTS) REF: 632-02-004 (CHILDREN)

Defibrillator AED Electrode Defi 5s

Adult electrodes featuring gel construction / adhesive / non-polarized defibrillation pads / non-sterile. Packaging: 1 unit.

REF: 496-02-004

Defibrillator AED HR-701 & 701Plus Adult and Pediatric Electrode

Adult electrodes featuring a gel composition. Adhesive, non-polarized defibrillation pads suitable for both children and adults; non-sterile. Packaging: 1 piece.

REF: 496-02-002

Defibrillator AED HR501 Adult and Pediatric Electrode

Adult electrodes featuring gel construction / adhesive / non-polarized defibrillation pads / appropriate for both children and adults / non-sterile. Packaging: 1 unit.

DEFIBRILLATOR ACCESSORIES

Defibrillator Wall Mount HR501 RADIAN

Radian Aed HeartGuardian defibrillator wall mount, equipped with retaining straps for secure support and installation on a wall. Designed for use in ships, public spaces, and buildings, ensuring the defibrillator is positioned in a visible location for prompt access during emergencies. Packaging: 1 unit.

REF: 496-02-009

MINDRAY C-series defibrillator transport case

Adjustable shoulder strap and carrying handle facilitate the effortless transport of your device. A transparent viewing window allows for the inspection of the electrode expiration date without the need to remove the defibrillator from its case. An internal pocket is provided for the storage of supplementary electrode sets. An external zippered pocket is available for the organization of additional first aid accessories. Packaging: 1 piece.

REF:

ARKY Outdoor Defibrillator Safety Cabinet with Alarm

Metal external defibrillator cabinet. Constructed from high-resistance polystyrene. Features an alarm that activates automatically upon door opening. Powered by an economical battery. Completely waterproof and dustproof. Compatible with all automatic external defibrillators. Dimensions: 40x34x20 cm. Available in green. Packaging: 1 unit, box of 4 units.

REF: 613-02-001

ARKY Indoor AED Cabinet without alarm

Metal box 60121 indoor defibrillator without alarm. This product represents the optimal solution for office environments, public services, gyms, swimming pools, and similar settings. It boasts exceptional durability, with an electrostatic paint finish that remains consistent over time. Its dimensions are $38 \times 38 \times 20$ cm. Available in green. Packaging: 1 piece, box of 4 pieces.

ARKY Indoor Circular AED Cabinet

Indoor round defibrillator enclosure. This represents the optimal solution for office environments, public services, fitness centers, swimming facilities, and similar venues. It boasts exceptional durability, with an electrostatic paint finish that remains consistent over time. Its dimensions are as follows: Length: 48 cm, Height: 48 cm, Depth: 18 cm. Available in green. Packaging: 1 unit, box of 4 units.

REF: 613-02-003

OXIMETERS

561

REF: 632-05-001

Finger Pulse Oximeter

Compact and portable design. OLED color display featuring four distinct display modes. SpO2 pulse histogram utilizing dual-wavelength LED technology. Parameters include SpO2, PR, and plethysmographic bar. Oxygen saturation range: 0 to 99%. Measurement accuracy: For oxygen saturation levels between 70% and 99%, the accuracy is \pm 2%. Heart rate measurement: 25 - 240 beats per minute. User-friendly with high precision. Automatic power-off occurs after 20 seconds of inactivity without a signal. It operates on AAA batteries, providing a continuous operational duration of 30 hours. Packaging: 1 unit, 6 units.

REF: 374-05-005

Fingertip Pulse Oximeter Air Po3 Bluetooth IHEALTH

Measures and displays data instantly on your device and smartphone: SpO2: Blood oxygen saturation. Pulse: Heartbeats per minute. Pl: Pulse index displayed in the iHealth MyVitals app. Tracks data, graphs, and history within the iHealth MyVitals app. Wireless Bluetooth 4.0 synchronization. Share your medical information with healthcare professionals or family members. Micro USB charging. Secure and complimentary data storage. Monitor oxygen saturation, pulse index, and heart rate using iPhone, iPad, and Android smartphones for iOS and Android version 4.0 and above. Packaging: 1 piece, 3 pieces, & 24 pieces

REF: 024-05-007

Finger Pulse Oximeter BM1000C

Finger pulse oximeter (Bluetooth). Oximeter color: Gray. One-touch operation. Reduced consumption. Low voltage alert. Bluetooth connectivity. Compatible with the Oxy Care - BerryMed application. Packaging: 10 units per box, total of 200 units.

REF: 168-05-001

FORMESA Finger Pulse Oximeter

Range: 70% - 99%. Accuracy: \pm 2%. 0 - 69%: undefined. Sensitivity: 1%. Frequency (BPM) Range: 25-250 bpm. Accuracy: \pm 3 bpm. Sensitivity: 1 bpm. Dimensions: 33 x 36 x 53 mm. Weight: 60 g, including batteries. Voltage: DC 2.5 - 3V, utilizing 2 x 1.5V batteries. Packaging: 1 piece, box of 100 pieces.

REF: 754-05-001

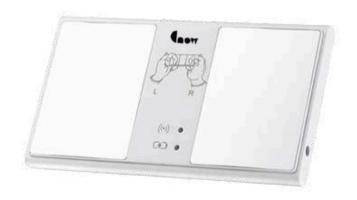

Finger Pulse Oximeter PC-60F: Safety A.T./G

Equipped with an SPO oxygen saturation sensor and an image processing unit, this device features a bright dual-color display and allows for four-sided reading direction adjustment. It includes a Perfusion Indicator to assist in selecting the appropriate measurement point. The SPO and pulse rate are displayed in both curve and bar chart formats. A low battery indicator is present, along with an automatic power-off function. The measurement range is as follows: SPO: 35-99%, pulse rate: 30-240 BPM. The resolution is 1% for SPO and 1 BPM for pulse rate. Accuracy is $\pm 2\%$ (75%-99%) for SPO, unspecified for values below 70%, and ± 2 BPM for pulse rate. It is suitable for adults with a finger diameter ranging from 10 to 22 mm. The device is powered by two AAA batteries (included) and is packaged as one piece in a box containing 136 units.

BORSAM - DOPPLER ULTRASOUND CARDIOGRAPHER DEVICE

Cardionow

Remote Patient Monitoring in Real Time with Cardiograph is an ecosystem that includes a credit card-sized cardiograph and a reputable software application, which transmits the user's electrocardiogram (ECG) along with supplementary valuable information in nearly real time. This system facilitates the transmission of data regarding cardiac electrical activity through a compact, portable device. Cardionow is similarly an ecosystem comprising a credit card-sized cardiograph and a recognized software application, which transmits the user's electrocardiogram (ECG) with additional pertinent information in almost real time.

REF: 625-05-001

Vascular Doppler Echo Sounder ES-101EX (Gynecological)

Portable Doppler for fetal heart rate and vascular measurements features a built-in speaker and transducer. It includes a large LCD display that shows waveform, bpm, intensity, and low pulse indication. The device operates on two AA alkaline batteries (included) and has an automatic shutdown feature after three minutes without a signal. The maximum speaker volume is approximately 250 mW, with a head frequency of 8.2 MHz. The heart rate range is 30–240 bpm (accuracy $\pm 3\%$), and the flow velocity range is 0–99 cm/s (accuracy $\pm 15\%$). It is equipped with a 3.5mm headphone jack. Clinical applications include the detection of maximum and minimum blood flow, peripheral vascular assessments, segmental pressure studies, and vein compression. Dimensions are 45 x 139 x 30 mm, and the weight is approximately 150g with batteries. This device is ideal for portable use in clinics and home visits.

DIGITAL PORTABLE EQUIPMENT

REF: 028-01-031

Digital Oscilloscope HR-40 by Nissei

Digital HR 40 NISSEI Oscilloscope from Japan. Finger placement rather than a chest strap. Records calories burned (for men and women). Capability to connect to a computer for data transfer. Packaging: 1 unit, box of 20 units

REF: 014-14-027

Inovalley Echomaster Digital Clock

Time: 2 alarms. 1/100 second chronograph. 10 measurement memory. Countdown timer. Packaging: 1 unit.

REF: 335-25-001

Emergency Telephone SPARE ONE

SpareOne is a phone designed for emergency calls, serving as a backup device. The included Energizer Ultimate Lithium L91 battery has a lifespan of 15 years. Packaging: 1 unit, box of 50 units.

Digital Arm Blood Pressure Monitors

Upper Arm Blood Pressure Monitor DSK-1011 NISSEI

Fully automatic electronic upper arm blood pressure monitor with a soft cuff designed for sizes 22–32 cm. It utilizes advanced measurement technology during cuff inflation, providing quicker and more comfortable readings. Features:

- Irregular heartbeat detection: Indicates potential arrhythmia.
- Body sensor: Identifies movements or interferences that may impact measurement accuracy.
- Dual memory: Accommodates two users with the capacity to store up to 60 measurements per user.
- Personal mode: Automatically adjusts inflation pressure based on the most recent measurements, enhancing accuracy and comfort.
- Circulatory risk indicator: Displays pulse pressure in relation to arterial stiffness
- WHO classification: Measurements are categorized according to the World Health Organization's guidelines.
- ESH Clinically Certified: Adheres to the IP2010 protocol established by the European Society of Hypertension.

Packaging: 1 unit, box containing 20 units.

REF: 028-01-102

Digital Upper Arm Blood Pressure Monitor NISSEI DS-B23-04 DELICARE

Fully automatic digital upper arm blood pressure monitor equipped with a soft cuff suitable for arm sizes 22–42 cm, accompanied by a convenient carrying case. Delivers exceptional accuracy and comfort, facilitated by gradual inflation technology during measurement. Features:

- Irregular heartbeat detection: Indicates potential arrhythmia.
- Body sensor: Identifies movements or interferences that may impact the measurement.
- Smart cuff: Monitors and alerts in the event of improper application. Extensive coverage (22–42 cm) with a soft finish.
- Innovative measurement technology: Provides a gentler and quicker process through inflation during measurement.
- ESH Clinically Certified: Adheres to the IP2010 protocol established by the European Society of Hypertension.
- Included: Carrying bag designed for secure storage and convenient transport.

Packaging: 1 unit, box containing 12 units.

NISSEI delicare 129 SIS 18 DIA 55 PL

REF: 028-01-200

Upper Arm Blood Pressure Monitor NISSEI DSK-1031

Fully automatic digital upper arm blood pressure monitor equipped with a smart and durable cuff size 22–42 cm. Provides versatility with oscillometric or auscultatory modes, along with adjustable parameters for customized measurements. Features:

- Automatic or manual mode: Choose between oscilloscope mode (AUTO) or auscultation based on user requirements.
- Adjustable inflation and deflation: The maximum constriction of the cuff is tailored to the patient's parameters.
- Irregular heartbeat detection: Alerts for potential arrhythmia.
- Body sensor: Identifies movements or interference that may compromise the measurement.
- Dual memory, dual user: Stores up to 60 results for each user.
- Smart cuff: Rigid with a soft finish, alerts if improperly positioned (22–42 cm). Circulatory risk index: Displays pulse pressure, associated with arterial stiffness and cardiovascular risk.
- WHO classification: Blood pressure readings are categorized according to World Health Organization standards.
- ESH Clinically Certified: Adheres to the IP2010 protocol established by the European Society of Hypertension.

REF: 028-01-100

Digital Arm Blood Pressure Monitors

Upper Arm Blood Pressure Monitor DS-11 by NISSEI

Fully automatic digital blood pressure monitor featuring an innovative design for ease of use. Utilization, velocity, and elevated precision in measurements. Perfect for routine blood pressure assessment. Features:

- Innovative technology: Provides rapid and dependable measurements effortlessly, owing to its sophisticated technical solutions.
- Irregular heartbeat detection: Recognizes potential instances of cardiac arrhythmia.
- Body sensor: Monitors movements or disturbances that may lead to inaccuracies in measurement.
- Average measurements: Computes and presents the average of the last three measurements for enhanced accuracy.
- Comfortable cuff: Featuring soft padding, it gently conforms to the arm appropriate for a circumference of 22–42 cm.
- ESH Clinically Certified: Adheres to the IP2010 protocol established by the European Society of Hypertension.

Additional Accessories: Features a convenient carrying bag for secure storage and effortless transport.

Packaging: 1 unit, box containing 20 units.

REF: 028-01-104

REF: 374-01-005

Wireless Upper Arm Blood Pressure Monitor Clear BPM1 IHEALTH

Innovative wireless blood pressure monitor equipped with WiFi connectivity, perfect for daily blood pressure assessment, offering advanced storage and analytical features through a smartphone. Features:

- One-button measurement: Effortless and instantaneous measurement by transmitting data to your smartphone via WiFi.
- Irregular heartbeat detection: Identifies signs of arrhythmia during measurement. Result comparison: Capable of storing up to 1,000 measurements, making it ideal for long-term monitoring.
- Comfortable cuff: Designed for arm circumferences of 22–42 cm, featuring a soft finish for enhanced comfort.
- ESH Clinically Certified: Adheres to the IP2010 protocol established by the European Society of Hypertension.

Packaging: 1 unit, box containing 16 units.

Wireless Upper Arm Blood Pressure Monitor NEO BP5S by iHealth

- Arrhythmia detection Adjustable cuff (suitable for all users)
- Initiate measurement with a button or through the app
- Automatic transmission of measurements to smartphone Graphical representation of measurement history
- Reminders based on the "3-3-3" rule (3 measurements in the morning and evening
- Capability to share data with the physician
- Smart digital upper arm blood pressure monitor designed for precise measurement of blood pressure and heart rate, equipped with arrhythmia
- Connects seamlessly to the iHealth MyVitals app (iOS & Android) for the storage and monitoring of measurements through graphical representations. Features:

Package contents: Adjustable armband, USB cable, carrying bag, instruction manual. Packaging: 1 piece, box of 24 pieces.

Wireless Upper Arm Blood Pressure Monitor Track KN 550BT IHEALTH

The iHealthTrack KN 550BT is a sophisticated wireless upper arm blood pressure monitor, designed for precise and convenient daily blood pressure assessments. It boasts a userfriendly display that changes color based on the results (green, orange, red), in alignment with World Health Organization guidelines. The device connects via Bluetooth 4.0 to the iHealth MyVitals application for smartphones and tablets, providing a graphical representation of measurements and facilitating easy sharing with healthcare professionals. Features:

- Cuff circumference: 22-42 cm
- Dimensions: 98 x 98 x 46 mm Weight: 438 g (including cuff and batteries)
- Power supply: 4 AAA batteries (1.5V) Battery life: up to 250 measurements
- Pressure measurement range:
- Systolic: 60–260 mmHg Diastolic: 40–199 mmHg Heart rate measurement range: 40-180 beats per minute

DIGITAL WRIST BLOOD PRESSURE MONITORS

NISSEI MOTION Digital Wrist Blood Pressure Monitor

High-resolution system: Scans the pulse wave 6 times more frequently than conventional blood pressure monitors, for greater accuracy.

- Innovative measurement technology during inflation
- Easy to use, with reliable and immediate results.
- Body sensor: Detects movements or interference that may affect measurement accuracy.
- M-Shaped cuff: Special design that stabilizes the wrist and ensures proper pressure on the blood vessels.
- Irregular heartbeat detection: Cardiac arrhythmia index.
- Checking correct position: Checks the correct placement of the cuff before each measurement.
- Dual memory for two users
- Stores up to 60 measurements per user.
- Easy to transport
- Includes a rigid protective case for safe storage and transport.
- WHO classification: It categorizes blood pressure results according to World Health Organization standards

Case for safe storage and transport. Packaging: 1 piece, box of 40 pieces.

REF: 028-01-201

Wrist Blood Pressure Monitor WSK-1011 NISSEI

Automatic, digital wrist blood pressure monitor with "M-Cuff"® technology for accurate measurements, approved by the European Society of Hypertension (ESH). Ideal for use at home, at work or on the go.

Features:

- Measurement of systolic, diastolic pressure, pulse & arrhythmia
- Motion detection during measurement
- Clock function with date & time
- Pulse pressure display
- Irregular heartbeat (IHB) control
- WHO (World Health Organization) classification
- Automatic shut-off after 3 minutes
- Averaging function
- Memory 2 users x 60 measurements
- Error indication during use

Specifications:

- Measurement method: Oscillometric
- Wrist circumference: 12.5 22.5 cm.
- Dimensions: 70 x 70 x 27 mm
- Weight: 110g (without batteries)
- Operating environment: +10°C to +40°C / 15-85% RH
- Packaging: 1 piece, box of 20 pieces.

REF: 028-01-101

Wireless Wrist Blood Pressure Monitor View BP7s Bluetooth IHEALTH

Wrist blood pressure monitor connector with Bluetooth 4.0 for direct connection to smartphone via the free iHealth MyVitals app (iOS & Android). Easy viewing of measurements on the device screen or in the app.

Features:

- Bluetooth 4.0
- Direct connection and compatibility with iOS and Android.
- \bullet Dimensions and weight 72 x 74 x 17.6 mm, weight 120g, for comfortable use and transport.
- \bullet Cuff circumference 13.5 22 cm. Soft and ergonomic cuff suitable for the wrist.
- Measurement method
- Oscillometric with inflation for accurate measurements.
- Memory Stores up to 120 measurements for monitoring.
- Measuring range Systolic pressure: 60-260 mmHg Diastolic pressure: 40-199 mmHg Pulse: 40-180 bpm
- Accuracy: Pressure: ±3 mmHg, Pulse: ±5%
- Packaging: 1 piece, box of 2 pieces.

DESKTOP DIGITAL PRESSURE GAUGE

MILLE

REF: 028-01-035

REF: 028-02-109

Mercury-Free Blood Pressure Gauges DM -3000 NISSEI

- User selectable oscillometry (AUTO) or listening (MANUAL) mode for greater flexibility.
- Professional precision and easy operation.
- Adjustable inflation and deflation speed, with maximum cuff pressure adapted to the patient's needs.
- Cuffs for each patient: Two cuffs (M: 22-32 cm / L: 32-42 cm) with a soft finish, washable and comfortable for each arm.
- 7 Memories
- Recording of the last 7 measurements and their average values.
- Power supply with choice
- Operates with AC adapter or rechargeable Ni-MH batteries, both included.
- Easy-to-read mercury column and digital results display.
- Remote use.
- Long inflation tube and 5-wheel trolley for easy movement.
- ESH Clinically Certified
- According to the IP2002 protocol of the European Society of Hypertension.
- Additional Accessories
- Ni-MH 4.8V DC rechargeable battery Universal charging cable 100-240V 50/60 Hz Cuff M (22-32 cm) with soft end Cuff L (32-42 cm) with soft end Packaging: 1 piece, box of 4 pieces.

Wheeled stand for Nissei DM-3000 blood pressure monitor, sturdy construction. Suitable for Doctors' Offices, Clinics and Hospitals for transporting the blood pressure monitor to patient rooms.

Height 1 – 1.65 cm.

REF: 028-01-099

Tabletop Semi-automatic Blood Pressure Monitor DM1000 NISSEI

Digital alternative to the manual sphygmomanometer with easy-to-use operation.

- Column LCD display with backlight.
- With a 1 mmHg grading accuracy for clear and accurate results.
- Includes: Standard cuff and fluorescent lamp for easy use and visibility.
- ESH Clinically Certified.
- Packaging: 1 piece, box of 20 pieces.

ANALOG PRESSURE GAUGES

Blood pressure monitor with stethoscope 001 TARGET

Analog upper arm blood pressure monitor with built-in stethoscope TARGET 001, equipped with a rotating point valve and DRing cuff.

- Measurement scale 0-300 mmHg.
- Packaging: 1 piece, box of 50 pieces.

REF: 024-01-001

MAC CHECK blood pressure monitor with stethoscope

Mac Check Anats 501 Japanese sphygmomanometer with built-in stethoscope, pulse oximeter and DRing cuff with velcro closure. Manometer with a diameter of 46 mm, measuring range 0-300 mmHg with divisions of 10 units, accuracy ± 3 mmHg. Precision valve with easy twist tap for air release.

- Cuff circumference 22-32 cm.
- Measurement range 0 300 mmHg
- Accuracy ± 3 mmHg

Packaging: 1 piece.

• Packaging: 1 piece, box of 50 pieces.

REF: 001-02-100

Adult Tabletop Blood Pressure Monitor ERKA VARIO 285

Erka Vario 285 tabletop sphygmomanometer with basket, Germany, with 0-300 mmHg manometer, 150 mm diameter and 2 mm graduations. High quality and precision, with valve and single tube. Packaging: 1 piece.

REF: 006-01-112

Blood pressure monitor ERKA VARIO-(BODY)

Germany, with a 0-300 mmHg manometer, 150 mm diameter, and graduations every 2 mm.
High quality and precision, with valve and single tube.

REF: 006-01-114

ERKA VARIO Children's Table Blood Pressure Monitor 288 BODY

Aneroid basic model for general use, according to EN 1060. With wall or rail mounting accessories, stable. Packaging: 1 piece.

REF: 006-01-115

^{*} A wide variety of ERKA analog pressure gauges is available upon request.

STETHOSCOPY

REF: 006-03-014

Stethoscope Sensitive 525.7591 ERKA

Stethoscope with single tube, membrane and funnel side.

- Double cone, diameter Ø 52 mm.
- Delivered in a decorative box with instructions for use.
- Packaging: 1 piece.

REF: 006-03-009

Children's Stethoscope Erkaphon ERKA 545

Children's stethoscope double cone 30mm Erka Erkaphon 545 Packaging: 1 piece.

REF: 024-03-001

Stethoscope Simple HS30A SAFETY_{A.T./G}

Single-membrane adult bell, \emptyset 47 mm, sensitive for sound collection.

- Aluminum bell with stainless steel chest piece, for good acoustic conductivity.
- Single PVC pipe.
- Packaging: 1 piece, box of 100 pieces.

REF: 024-03-006

Neonatal/Infant Stethoscope HS30R2 SAFETY A.T./G

- Double cone, specially designed for newborns and infants
- Chest piece diameter: Ø 23 mm
- Suitable for listening to the heart and lungs
- Zinc alloy head with high sound conductivity
- Antifreeze ring with double design
- Single PVC pipe

Packaging: 1 piece, box of 25 pieces.

STETHOSCOPY

Littmann Classic II Pediatric Stethoscope

The 3M™ Littmann® Classic II Pediatric Stethoscope is designed specifically for use with the youngest patients. Packaging: 1 piece, box of 3 pieces.

REF: 402-03-101

Littmann Classic III Stethoscope

Littmann Classic III 5807 With Tube in light blue color & finish on the capsule in various colors 27ln/69cm.
Packaging: 1 piece.

REF: 056-03-039

Littmann Bluetooth 3000 BK Electronic Stethoscope

Littmann Electronic Stethoscope. Bell weight 98 gr., diaphragm diameter 5.1. It is applied in cardiology with high efficiency. It is 69 cm long. The bell technology is double-sided.

Packaging: 1 piece.

REF: 056-03-032

Littmann 3200 Electronic Stethoscope with Bluetooth

Littmann Electronic Stethoscope with Bluetooth. Bell weight 98g., diaphragm diameter 5.1. Applied in cardiology with high performance. It has a length of 69cm. the bell technology is double-sided. Packaging: 1 piece.

REF: 056-03-017

Littmann Master Cardiology Stethoscope

Littmann Cardiology Stethoscope. Bell weight 90g, diaphragm diameter 5.1. Applied in cardiology with high performance. It has a length of 69cm. Packaging: 1 piece.

REF: 056-03-008 (BLACK) REF: 056-03-006 (RED)

Littmann Cardiology VI Stethoscope

Littmann Cardiology VI Stethoscope. Bell weight 87g, diaphragm diameter 4.3. Applied in cardiology with high performance. Packaging: 1 piece.

REF: 056-03-050

Littmann Classic II Infant Stethoscope

Littmann Classic II Stethoscope. Infant, Physical Assessment and Diagnosis. Bell weight 30g., diaphragm diameter 2.7. It is applied in cardiology with high efficiency. It has a length of 71cm. Double-Sided Bell Technology. Packaging: 1 piece.

REF: 056-03-012

Littmann Lightweight II S.E. Stethoscope

Littmann Lightweight II S.E. Stethoscope. Physical Assessment and Blood Pressure. Bell weight 47g., diaphragm diameter 5.4. It is applied in cardiology with high efficiency. It has a length of 71cm. Double-Sided Bell Technology.

Packaging: 1 piece.

Stethoscope Color Chart

PULMONARY TRAINERS NEBULISERS

REF: 168-09-009

Lung Trainer 3BALL

Lung exerciser with three colored balls

- Made of transparent material
- It has 3 chambers of 600, 900 and 1200cc/second in the 3 stages respectively (tidal volume).
- It has 3 colored balls for easier reading of the air volume. Light in weight and
 easy to carry. It has a special sticker with the patient's details. It has a small
 diameter spiral tube that connects to the trainer and a soft plastic mouthpiece.
- It is used individually for each patient.
- Packaging: 1 piece, box of 50 pieces.

REF: 318-09-026

Farmasol Nebulizer

Maximum pressure: 3.0 bar Operating pressure: 1.3 bar Maximum flow: 16 Lt/min Operating flow: 8 Lt /min

Nebulization rate with 2 ml solution: 0.50 ml/min Mass Mean Aerodynamic Diameter: 3.25µm (MMAD)

Inhaled ratio (<5µm): > 70% Power supply: 230 V - 50 Hz Consumption: 140 VA

Operating conditions: Continuous

Noise level: 60 dB Device weight: 1.8 Kg

Device dimensions: 14 x 20.5 x 15 cm
• Packaging: 1 piece, box of 6 pieces.

One-button operation for easy use. Concise and simple design.

Extremely effective drug delivery.

Portable for home and clinical use.

Large accessory compartment.

Powerful piston pump.

- Ratings AC 230V, 50Hz 0.6A
- Extreme Pressure 205~400Kpa
- Free Flow Range >10L/min
- Nebulization pressure 70~190Kpa
- Noise level <60dB
- Maximum capacity of nebulizer tool set 10ml
- Particle size ≤ 5µm & 60%
- Nebulization rate >0.2 ml/minute
- Operating mode 20 minutes on, 40 minutes off
- Operation Temperature and humidity atmospheric pressure -10 \sim 40 , 95% humidity and below 860 \sim 1060hPa
- Size 280x180x88
- Packaging: 1 piece, box of 6 pieces.

REF: 024-09-021

REF: 024-09-022

Nebulizer NB-216C

- Size: 166x136x104 mm
- Main device input: 1.35A
- Extreme pressure: 30-50 psi
- Free flow range: ≥4L/min
- Nebulization pressure: >6 psi
- Main device noise level (with cup): ≤45 dB
- Operating mode: continuous work
- Packaging: 1 piece, box of 6 pieces.

SUCTION DEVICES

REF: 071-09-017

Suction Device SINGLE PUMP AS800A ASPEED2

3A Italian suction device ASPEED2 PROFESSIONAL AS800A, 1000cc container, antibacterial filter and silicone hose, 15lt suction capacity, continuous operation, single pump.

Piston electric compressor with thermal protection device.

Single pump version: low flow, high vacuum unit.

Fuse: T1.6A - 250V.

Single pump version voltage: 230/240V~50Hz 150VA.

Adjustable vacuum level: 0 ~ - 0.85 bar.

Single pump air flow: 15L/min. Dimensions: 196 x 357 x 185 mm. Single pump version weight: 2.5 kg.

Noise level: 55 dBA. Operating conditions:

Temperature: Minimum: 0°C, Maximum: 40°C Humidity: Minimum: 10%,

Maximum: 95% Packaging: 1 piece, box of 2 pieces.

Suction Device DUAL PUMP AS900A ASPEED2

3A Italian ASPEED2 AS900A suction device, 1000cc container, antibacterial filter and silicone hose, Double Pump.

Piston electrocompressor with thermal protection device. Double pump version: high flow, high vacuum unit.

Fuse: T1.6A – 250V.

Dual pump version voltage: 230/240V~50Hz70VA.

Adjustable vacuum level: 0 ~ - 0.85 bar.

Dual pump air flow: 22L/min.
Dimensions: 196 x357 x 185 mm.
Weight of dual pump version: 3.2 kg.

Noise level: 55 dBA.

Operating conditions:

Temperature: Minimum: 0°C, Maximum: 40°C Humidity: Minimum: 10%,

Maximum: 95% Storage conditions:

Temperature: Minimum: -10°C, Maximum: 50°C Humidity: Minimum: 10%,

Maximum: 95% Packaging: 1 piece, box of 2 pieces.

Suction Device 15Lt/min ASPIRET

Maximum Suction Pressure: -0.75 Bar. Flow Rate: 15Lt/min at -0.75 Bar. Noise Level with Container: 59.60 dB.

Weight: 2.95Kg. Packaging: 1 piece.

REF: 318-09-016

Suction Device 40Lt/min ASPIRET

Maximum Suction Pressure: -0.80 Bar. Flow Rate: 40Lt/min at -0.80 Bar. Noise Level with Container: 60.5 dB. Weight: 4.15Kg.

Weight: 4.15Kg. Packaging: 1 piece.

SUCTION DEVICES

Battery Plus MINI ASPEED Suction Device

Tracheotomy suction device, battery power, 3A model MINIASPEED BATTERY Plus with the ability to be used even with a discharged battery by connecting the device to the power supply, with a 1000cc container, antibacterial filter and silicone tube, suction capacity 18lt/min. continuous operation with the battery for 35 minutes.

Piston electric compressor with lifetime lubricant. Metal housing painted with epoxy powder paint.

Voltage: 12VDC.

Adjustable vacuum level: 0 ~ - 0.80 bar.

Air flow: 18L/min.

Dimensions: 37x10x24 cm.

Weight: 5.5 kg.

Noise level: 60 dBA Battery charger: PRI: $200 - 250V \sim 50 - 60$ Hz SEC: 12VDC 0.5A Multi-voltage switching battery charger: PRI: $100 \div 240V \sim 50 - 60$ Hz

SEC: 14VDC 4.28A Packaging: 1 piece, box of 2 pieces.

Glucose control, whenever and wherever you need it! Anytime CT3 - Real-Time CGM for absolute freedom!

Achieve your goals with Anytime CT3 - Real-Time CGM for ultimate control!

480 measurements per day, directly to your mobile phone via Bluetooth

Anytime CT3 for continuous control!

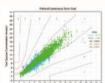

- -7 Sugar Trend Flows
- -4 glucose schedule options
- -Statistics and Daily Report can be exported
- -Share real-time data with up to 20 people
- -Record meals, exercise and insulin

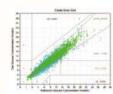

- -Real-time High and Low alerts to take action
- -May help reduce HbA1c
- -May help reduce hypoglycemic events

Clinical trial of the CT3 continuous glucose monitoring system, involving 72 patients at three hospitals in China, achieved an overall MARD (vs. venous blood) of 9.07% and a consensus error range of 99.95%.

CGM CT3 is now prescribed

Download or update the Anytime app to automatically check your blood sugar data on your mobile!

DIAGNOSTIC INSTRUMENTS

ARIA Glucose Meter

The Aria blood glucose meter merges exceptional accuracy with user-friendly design, rendering it suitable for both professional and home applications.

User-friendly display: Results are accompanied by a color indicator for prompt evaluation of glucose levels.

GDH-FAD technology: Enzymatic technology that guarantees results remain unaffected by oxygen, maltose, or galactose.

Three sample types: Accepts venous, arterial, and capillary blood.

Illuminated display: For effortless reading, even in dimly lit environments.

Ejectable strip mechanism: To prevent contact with the used sample—ideal for hospital settings. Six programmable reminders: To enhance patient adherence.

Sectings. Six programmable reminders. To enhance patient adherence.

Customizable thresholds: Set personalized values for "Low," "Normal," and "High."

ARIA glucose testing strips

High accuracy with the GDH-FAD enzyme. Complete compatibility with the ARIA meter. Minimal blood sample required and rapid results. Individual doses for hygienic and secure usage. Perfect for daily monitoring and improved glucose management.

Meter Packaging: 1 unit, box of 100 units. Tape Packaging: 1 unit, box of

REF: 155-05-500

OGCARE Glucose Monitoring Device

Utilize without coding (electrode strip technology) Immediate results in 5 seconds with a 5µL sample Measuring range: 20–600 mg/dL Option to mark measurements post-meal 300 memory slots Capability to transfer data to a PC The system comprises the OGCare meter.

10 test strips, painless lancing pen, 10 sterile lancing devices

OGCARE 50-Piece Glucose Test Strips

Designed for exclusive use with the OGCare meter, these glucose test strips are suitable for in-vitro diagnostic applications and self-testing. They measure capillary blood glucose through an electrochemical method and contain glucose oxidase stabilized on the strip's surface. The results are intended for monitoring purposes rather than diagnosis, providing accurate readings with a minimal blood sample. Meter Packaging: 1 piece, box of 100 pieces. Strip Packaging: 1 piece, box of 500 pieces.

REF: 155-05-080

UA SURE II Uric Acid Analyzer

Measures uric acid levels in the blood (3 – 20 mg/dL or 179 – 1190 μ mol/L). Minimum blood sample required: 6 μ L. Large LCD display for enhanced readability. Memory function for the last 10 measurements. User-friendly operation with chip coding. Powered by a single 3V lithium battery (CR2032).

Package includes: UA Sure Meter

5 uric acid strips

Painless lancing device

Carrying case

Battery

Chip code

Result documentation form

UA SURE II Uric Acid Test Strips

Employs advanced biosensor technology
Specifically designed for use with the UA Sure uric acid meter
Appropriate for healthcare professionals and self-testing
User-friendly, providing rapid and dependable results
Perfect for convenient, daily monitoring of uric acid levels Meter Package: 1
piece. Strip Package: 1 piece.

DIABETIC CONSUMABLES - NEEDLES

Pain-Free Piercing Pen

Pen for individual use for the quantitative assessment of blood glucose.

Insulin Pen Needle SAFETYA.T./G

191-10-433 / 33G / 4 mm — Green

Insulin pen needles (sterile, single-use) Sterile, non-toxic, and non-pyrogenic Designed for single use – intended for one patient Colors, dimensions, and product codes: 191-10-531 / 31G / 5 mm — Violet 191-10-631 / 31G / 6 mm — Blue 191-10-831 / 31G / 8 mm — Orange 191-10-432 / 32G / 4 mm — Light Green 191-10-532 / 32G / 5 mm — Pink 191-10-632 / 32G / 6 mm — Dark Blue

Packaging: Box of 100 pieces, with 50 boxes per carton (5000 pieces)

Insulin Pen Needle MICROPEN RAYS Italy

Insulin pen needles in individual blister packs Packaged in individual blister packs with secure medical paper Ensures maximum sterilization safety Colors, dimensions, and product codes: 257-10-431 / 31G / 4 mm — Light blue

257-10-531 / 31G / 5 mm — Violet

257-10-631 / 31G / 6 mm — Blue

257-10-831 / 31G / 8 mm — Orange

257-10-432 / 32G / 4 mm — Light green

257-10-532 / 32G / 5 mm — Pink

257-10-632 / 32G / 6 mm — Dark blue

257-10-433 / 33G / 4 mm — Green

Packaging: Box of 100 pieces, carton of 12 boxes (1200 pieces)

DIABETIC CONSUMABLES

Insulin Cooling Case

Insulin pouch containing gel

Maintains the temperature of insulin vials Ideal for travel with

refrigerated medical bags or cooling devices

Mitigates issues during transportation and ensures safety in medical

emergencies

Dimensions: 21 x 11 x 7 cm

Accommodates 2 medication vials and 1 syringe pen

Features 2 pockets for small supplies, one positioned beneath the ice gel for convenient daily access Includes refreezable ice gel Preserves medication temperature for up to 12 hours Constructed from attractive,

durable nylon Easily washable

Packaging: 1 unit, box containing 48 units.

REF: 153-19-004

30G Safety Piercing Needles A.T./G

Safety A.T./G disposable lancets

Constructed from polyethylene

Needle composed of austenitic stainless steel Dimensions:

Total length: $32 \text{ mm} \pm 1 \text{ mm}$ Body length: $22.8 \text{ mm} \pm 0.5 \text{ mm}$ Needle cap size: $9 \text{ mm} \pm 0.5 \text{ mm}$ Outer needle: $3.3 \text{ mm} \pm 0.3 \text{ mm}$

Needle diameter 30G: 0.298-0.320 mm

Needle bore ≤ 0.7 N

Use: For obtaining capillary blood samples in glucose monitoring

Sterile, single-use

Storage: in a clean, ventilated environment, temperature 0-40°C, humidity

0-80% RH, pressure 1 KPA.

Packaging: Box of 50 units, carton of 400 boxes (50 units each).

REF: 529-10-001

ROMED sterile metal lancets

23G stainless steel needle

Material: stainless steel

Sharp point length (including stitch point): 4 cm

Needle size: 23G

Stitch point thickness: 0.15 – 0.16 mm

Sterilization method: gamma rays

Expiration date: 5 years post-sterilization

Sterile per piece in a paper pouch

Packaging: 1 box (200 units), case of 200 boxes (200 units).

REF: 010-30-094

Alcohol Wipe 6.5 x 3.0 cm ROMED

Skin Cleansing Wipe for Injections

Purpose: skin cleansing prior to injection

Non-woven wipe (polyester and glucose blend), 50 g/m², 2-ply

Thickness: 0.035 mm Dimensions: 6.5 x 3.0 cm

Active ingredients: 70% isopropyl alcohol

Inactive ingredient: water Liquid volume: 0.4 – 0.6 ml per package

Alcohol content: $\pm 0.02 \text{ g/cm}^2 (\pm 0.45 \text{ per piece})$

Aluminum packaging: paper, aluminum foil, and plastic Packaging

weight: 73 g/m² Packaging thickness: 0.06 mm

Packaging: 1 box (100 units), case of 50 boxes (100 units).

REF: 010-30-010

REF: 649-05-011

Stool Hemoglobin Detection Test: All Tests

FOB Rapid Test Cassette

A rapid chromatographic immunoassay designed for the qualitative detection of occult blood in stool samples. This test is user-friendly, providing clear and reliable results within just five minutes, with a proven accuracy of 99.1%. It employs a two-antibody "sandwich" assay for the selective identification of occult blood, capable of detecting levels as low as 50 ng/ml or 6 μ g/g of stool. The accuracy of this test is unaffected by the patient's diet, in contrast to guaiac methods. This CE-marked product is ideal for at-home self-testing (for in vitro diagnostic use). Packaging includes one piece per box, with a total of 300 pieces.

REF: 615-05-002

WONDFO Fecal Hemoglobin Detection Assay

Wondfo Fecal Hemoglobin (FOB) Detection Test A one-step immunological assay for the qualitative identification of human hemoglobin in feces, indicated for the early detection of gastrointestinal bleeding. It boasts high sensitivity (96.88%) and specificity (99.40%). Detection time is 10 minutes, and the collection tube minimizes the need for sample handling. This test is suitable for identifying small quantities of blood (iFOB/FIT) and can be stored at room temperature. It is reliable and CE marked. Packaging includes 1 piece per box, with a total of 320 pieces.

ALL TEST Rapid Antigen Detection Test (Self-Administered)

SARS-CoV-2 Rapid Antigen Detection Test (Nasal Swab) Single-use kit designed for the detection of SARS-CoV-2 from a nasal swab Intended for symptomatic individuals with suspected COVID-19 infection Self-test format ensuring high privacy Rapid results with straightforward visual interpretation User-friendly operation, no equipment necessary High accuracy: Sensitivity 99.7% Specificity 99.6% Overall accuracy 99.5% Packaging: 1 piece, box of 480 pieces

REF: 649-05-004

Rapid Antigen Detection Test for SARS-CoV-2 (COVID) and Influenza A+B Combo - All Tests

Disposable kit for the detection of SARS-CoV-2, influenza A, and influenza B. Sample: nasal swab collected by the patient. Intended for both symptomatic and asymptomatic individuals with suspected infection. Results available in 10 minutes. Rapid and straightforward visual interpretation. User-friendly operation without the need for additional equipment. High accuracy. Packaging: 1 unit, box of 400 units.

Rapid Antigen Detection Test for SARS-CoV-2 (COVID-19), Influenza A and B, and RSV - All Tests

Detection of SARS-CoV-2, Influenza A, and Influenza B Antigen Sample: self-collected nasal swab Intended for use in symptomatic and/or asymptomatic individuals Ideal for the rapid diagnosis of COVID-19 and/or influenza Result time: 10 minutes Fast and reliable results Easy visual interpretation Simple procedure – no equipment required High accuracy Packaging: 1 piece, box of 400 pieces

REF: 649-05-005

Streptococcus A Rapid Antigen Detection Test

Strep A All Test Rapid Antigen Detection Test Qualitative detection of Strep A antigens from a pharyngeal swab Assists in diagnosing group A streptococcal infections Rapid results Clear visual interpretation User-friendly operation without the necessity for equipment High accuracy Packaging: 1 piece, box of 504 pieces

REF: 649-05-006

Adenovirus, Coronavirus (SARS-CoV-2), Influenza A/B, and RSV Detection Test SEJOY

Rapid immunochromatographic test for the qualitative detection of antigens: SARS-CoV-2, Influenza types A and B, and Respiratory Syncytial Virus (RSV). Ideal for use in cases presenting respiratory symptoms. Sample: Nasopharyngeal. Results available in 15–20 minutes. Accuracy exceeds 97%. The procedure is painless and user-friendly. Includes: rapid test device, swab, extraction tube with 0.5 ml buffer, and instruction sheet.

Packaging: 1 piece, box of 360 pieces.

REF: 725-05-025

REF: 010-05-001

CLEAR TEST Pregnancy

HCG Pregnancy Test – Lateral Chromatography (4.0 mm) A qualitative immunobiological assay for the detection of human chorionic gonadotropin (HCG) in urine samples. This single-step lateral chromatographic method boasts an accuracy of 99% and high sensitivity, capable of detecting concentrations as low as ≥25 mIU/ml. Results are available within 5 minutes, featuring a distinct control line (C) and test line (T). The kit includes a conjugate pad with monoclonal b-HCG antibodies conjugated to colloidal gold, and a nitrocellulose membrane containing a-HCG antibodies (T zone) and anti-goat IgG (C zone). Its straightforward and rapid application makes it ideal for laboratories and pharmacies. Strip width: 4.0 mm. Packaging: 1 piece, box of 320 pieces.

Ovulation Assessment HCG Pregnancy Test – Materials & Storage Instructions

Package Contents: Individually sealed test strips Detailed instructions for use

Required materials (not included): Clean urine collection containers Stopwatch or watch for timing

Packaging:

1 Box containing 30 pieces

REF: 348-05-002

LH Ovulation Rapid Test

REF: 348-05-010

Urine Strips, 100 pieces

Multiparametric Urine Analysis Strips are plastic stable strips featuring reagent areas designed for the rapid detection of multiple parameters in a urine sample. The analyses conducted include: Ascorbic acid, Glucose, Bilirubin, Ketones (acetoacetic acid), Specific gravity, Blood pH, Protein, Urobilinogen, Nitrite, and Leukocytes.

Features

Rapid and reliable results Suitable for laboratory or clinical use Easy interpretation via color comparison

Packaging:

1 box containing 100 pieces.

Helicobacter pylori Detection Test (H. pylori)

Helicobacter Pylori Detection Test (H. pylori) Rapid immunoassay for the qualitative identification of antibodies against H. pylori in whole blood, serum, or plasma samples. Application: An auxiliary tool in the diagnosis of H. pylori infection. Features a visually interpretable immunological reaction. Allows for direct application to samples without the necessity for specialized equipment. Package contents: Tests in individual packages with predefined reagents, disposable pipettes, buffer solution (PBS + Tween 20 + preservative), and printed instructions for use. Required (not included): Sample collection container, timer, and centrifuge (for serum/plasma samples). Result time: a few minutes.

Packaging: 1 box containing 20 pieces.

REF: 348-05-007

Drug Screening

DrugTest Urine – Drug Detection Test A rapid immunochromatographic assay for the qualitative identification of drugs and their metabolites in urine specimens. Features: Detection from a specified concentration threshold Results available in 5 minutes Designed for use by healthcare professionals High reliability and sensitivity Detectable substances (varies by test): Morphine (MOR) Hashish (THC) Cocaine (COC) Benzodiazepines (BZO) Methadone, Amphetamines, Barbiturates, Methamphetamines, etc. Available substance combinations: 4-parameter test: Morphine – Hashish – Cocaine – Benzodiazepines (MOR, THC, COC, BZO) Selection of tests with 1 to 11 parameters Packaging: 25 tests per box Each test individually packaged in a sealed unit Reading time: 5 minutes

Packaging: 1 box containing 25 pieces

REF: 348-05-017

Syphilis Antibody Combination Rapid Test

Syphilis Rapid Test - Rapid Syphilis Detection Test

This rapid immunochromatographic assay is designed for the qualitative detection of Treponema pallidum (TP) antibodies in whole blood, serum, or plasma.

Features:

Detection of IgG and IgM antibodies against TP

Combination of particles coated with syphilis antigen and anti-human IgG/IgM

Suitable for professional use

Provides reliable and prompt results

Each device is individually packaged in a sealed disposable format

Sample dropper included

Samples: Whole blood, serum, or plasma

Reading time: A few minutes

Packaging: 1 box containing 30 pieces

REF: 348-05-016

REF: 348-05-014

HIV 1/2 AB PLUS COMBO – Rapid Antibody Detection Test for HIV

Rapid and highly sensitive membrane assay for the qualitative detection of HIV types 1 and 2 antibodies in whole blood, serum, or plasma samples, utilizing the immunochromatography method. Features: Incorporates recombinant antigens gp41 and p24 for HIV-1 and gp36 for HIV-2 Detection of subtype O through a specific synthetic peptide No additional equipment necessary Results available in 10 minutes Intended for professional use only Stable at room temperature (2°C – 30°C) Reliability: Sensitivity: 99% Specificity: 99.8%

Packaging: 1 box containing 20 pieces

REF: 348-05-013

Troponin I Rapid Test – Swift Identification of Myocardial Troponin I

A rapid, one-step chromatographic immunoassay for the qualitative detection of human cardiac Troponin I in whole blood, serum, or plasma samples. This assay serves as an adjunct in the diagnosis of acute myocardial infarction (MI). Features include: Detection of Troponin I from four hours post-onset of pain, with persistence detectable for six to ten days following the episode. It exhibits high specificity and sensitivity in myocardial tissue and is also beneficial in cases of unstable angina, heart failure, and ischemic lesions (e.g., post-bypass). Advantages over CK-MB include: CK-MB normalizes within three days, while Troponin I remains elevated for an extended duration, providing a more reliable indication of myocardial damage. Packaging: One box containing thirty pieces.

REF: 348-05-015

Anti-HBs (HBsAb) Rapid Test – Identification of Hepatitis B Antibodies

Rapid chromatographic immunobiological assay for the qualitative detection of antibodies to the hepatitis B virus (HBsAb) in human whole blood, serum, or plasma. Features: Utilizes solid-phase immunochromatographic technology High sensitivity two-site assay Employs polyclonal antibodies and recombinant HBs antigens Recombinant HBs antigens are immobilized in the test zone (T) Polyclonal anti-HBsAg antibodies are immobilized in the control zone (C) Applications: Appropriate for laboratory use, pre-vaccination, or post-vaccination screening No additional equipment required Results available within minutes Packaging: 1 box containing 30 pieces

FLOOR SCALES

Digital Scale 180 kg ROMED

The scale is capable of measuring weight, body fat, body water, and muscle percentage. It features a 6mm tempered safety glass platform, an auto-zero function, and a power-off function. Additionally, it provides low battery and overload indications. Material composition includes glass and ABS plastic. Scale dimensions are $30.0 \times 30.0 \times 1.75$ cm, and it has an LCD display. The net weight of the scale is 1.55 kg, with a maximum weighing capacity of 180.0 kg and an accuracy of 0.1 kg. It can accommodate up to 9 users.

Packaging includes 1 piece per box, with a total of 6 pieces.

REF: 010-36-017

Floor Scale 125 kg BS004

Analogue Floor Scale BS004. Measurement capacity: 275 lbs or 125 kg. Shape: Square. Measurement method: Analogue. Material: Plastic. Accuracy: 1 kg. Easy-to-clean ABS cover with PU leather. Maximum weight: 125 kg.

Packaging: 1 piece, box of 10 pieces.

REF: 236-36-002

Digital Glass Floor Scale

Digital Glass Floor Scale. High-precision sensors. Large LCD screen for effortless reading. Automatic shut-off feature. Weight capacity of 150 kg. Brand: TIANSHENG Model: TS-2005D Type: Household Scale Display: LCD Maximum Weight: 180 kg Accuracy: 0.1 kg

Packaging: 1 piece, box of 10 pieces.

REF: 236-36-001

Fit HS2S IHEALTH Scale

iHealth Smart Body Composition Scale

This compact and user-friendly scale features Bluetooth technology for comprehensive body analysis. It measures weight, body mass index (BMI), muscle mass, lean mass, bone mass, body fluids, fat percentages (both body and visceral), and daily caloric requirements, displaying all measurements on a backlit LED screen. The iHealth MyVitals application tracks history and graphs, allowing for the storage of up to 500 measurements per user. This device is ideal for health monitoring in collaboration with professionals.

Key features include Bluetooth connectivity and synchronization with the application, the calculation of multiple body parameters, and a display with backlighting and an LED screen. Memory capacity supports up to 8 users, with 500 measurements per user.

Dimensions: 306 x 306 x 26.6 mm

Weight: 1,850 g

Power supply: 4x AAA 1.5V

Measuring range: 5 - 180 kg / Fat: 5% - 65%

Accuracy: 0.1 kg

Operating conditions: $5^{\circ}\text{C} \sim 40^{\circ}\text{C}$ / Humidity 20–85% RH

REF: 374-36-006

Packaging: 1 piece, box of 3 pieces

37

INFANT SCALE

REF: 521-36-001

Digital Baby Scale 20 kg BAMBY

This digital baby scale is both accurate and reliable, equipped with four high-quality sensors. It includes an ON/OFF button, tare adjustment, and manual unit selection. The scale features automatic reset and power-off functions to conserve energy, along with indicators for low battery and overload. The platform is constructed from durable yellow ABS. Weighing range: 0.5 – 20 kg Accuracy: 5 g LCD display dimensions: 72 x 28 mm Power supply: 1 lithium battery CR2032 (3V), included Battery life: up to 3,000 measurements Dimensions: 560 x 330 x 53 mm Weight: 4.5 kg (with battery)

Packaging: 1 piece, box of 4 pieces.

REF: 010-36-001

Digital Baby Scale BS003 by ROMED

The Romed BS-003 Baby Scale is a highly accurate digital scale. Maximum weight capacity: 20 kg. Accuracy: 0.005 kg. Accuracy range for 0-5 kg: 0.025 kg. Accuracy range for 5-10 kg: 0.030 kg. Accuracy range for 10-20 kg: 0.040 kg. Measurement units: kg and lbs. Features an LCD display, hold function for capturing the weight of a moving child, and tare function. Includes automatic reset and power-off capabilities, as well as low battery and overload indicators. Power source: 2 AAA batteries (included). Material: ABS plastic. Scale dimensions: 56.0 x 33.0 x 4.6 cm. Net weight of the scale: 1.68 kg.

Packaging: 1 unit per box, with a total of 4 units.

REF: 048-36-020

Digital Baby Scale SECA 354

Maximum Weighing Capacity: 20 kg Graduation: 10 g < 10 kg > 20 g Seca Features: TARE, BMIF, Auto-HOLD, Automatic Power Off Weight: 2.3 kg Power Supply: Battery Dimensions: 552 x 156 x 332 mm

Packaging: 1 unit.

SOEHNLE Infant Stimulator

The Soehnle 5001 height meter offers an alternative method of measurement of the body height. Not with a measuring tape or a height rod, but rather through an electronic ultrasonic measuring system. User-friendly, durable construction, and a timeless design characterize the Soehnle Professional height measuring unit. It is straightforward to operate, rapid, and precise. The housing is composed of white plastic, making it extremely lightweight at only 300 g. It is battery-operated with a 9V battery (not included) and features an LCD display with 10 mm high digits. An integrated level assists in achieving horizontal alignment, while acoustic recognition enhances usability. The automatic switchoff function activates approximately 30 seconds after the last measurement. Measuring range: 50-300 cm, with increments of 1 cm. Dimensions: 500 x 340 mm. Weight: 300 g.

Packaging: 1 piece.

MEDICAL SCALES & CLINICAL SCALES

Mechanical Scale SECA 786 150 kg

Scale Type: Column Scale

Weighing Surface: 278 x 75 x 273 mm

Display Type: Mechanical

Maximum Weighing Capacity: 150 kg

Graduation: 0.5 kg

Overall Dimensions: 295 x 910 x 500 mm

Weight: 6.9 kg

Technical Specifications of the Height Meter:

Measuring Range: 6-200 cm

Graduation: 1 mm

Dimensions (WxHxD): 55 x 1,480 x 286 mm

Dimensions of the Divider (WxHxD): 260 x 90 x 50 mm

Net Weight: 1.4 kg Packaging: 1 piece.

SECA 760 Mechanical Weighing Scale

Properties: Robust construction.

Large, easily readable dial.

Low profile with an expansive platform.

Precise and long-lasting.

Color options: Black, Ecru, Blue. Net weight: 0.6 square 3.5 kg. Platform width: 265 mm. Platform height: 70 mm. Platform depth: 265 mm.

Product width: 303 mm. Product height: 118 mm. Product depth: 470 mm.

Graduation: 1 kg. Capacity: 150 kg.

Packaging: 1 piece.

Digital Scale SECA 813

Step-off feature allows the patient to step on the scale, with the result displayed after stepping down. The auto-hold function ensures the value remains on the screen for a few seconds before the scale powers off. The Seca 813 Robusta Digital Scale features a broad steel base that is entirely flat, accommodating individuals with mobility challenges. This scale is ideal for use in gyms, pharmacies, and at home. Its dimensions are $433 \times 47 \times 373$ mm, and it weighs 2.9 kg. Type: Digital; Graduation: 0.1 kg; Maximum weighing capacity: 200 kg; Size: $433 \times 47 \times 373$ mm; Weight: 2.9 kg;

Packaging: 1 piece.

Digital Scale 7801 with Carrying Case by SOEHNLE

Soehnle Weighing Platform Germany

Mains power supply: power adapter 230V / 50 / 60Hz, 10mA, 2.2VA, 2-meter power cable.

Battery operation for approximately 350 hours using 4x 1.5V mignon batteries (not included).

Automatic shut-off feature in battery mode.

Platform dimensions: L 310 x W 275 mm.

Quatro-Tronic: platform equipped with 4 load sensors.

Digital display: housing constructed from durable plastic.

Wear-resistant and maintenance-free.

User-friendly one-button operation.

Unit conversion available to kg/lb.

Weighing increments: 100 g.

Soehnle Electronic Stimometer 5001.01 Weighing range: up to 200 kg.

Scale dimensions: 400 x 310 mm; weight: 6 kg.

Scale dimensions with suitcase: 605 x 395 mm; weight: 7 kg.

Digital Precision Scale 9230 0.01g SOEHNLE

Digital Precision Scale Micrometer Soehnle 9230 Germany. This instrument is ideal for laboratories, confectioneries, food industry sectors, pharmaceutical industries, hair salons, and other enterprises requiring precise micrometering. Graduation: 0.01 g. The electronic precision scale Soehnle-Professional 9230.01 is a highly accurate measuring device designed for weighing small quantities. Functions include weighing, calibration, piece counting, and weight percentage measurement. Measuring range: 0.6 kilograms. Graduation: 0.01 g. Scale dimensions: 213 mm x 193 mm x 66 mm. Platform: stainless steel. Power supply options include 230 VAC, 9 VDC, or rechargeable battery. Features a backlit LCD display and includes a standard weight of 0.500 kg for calibration purposes.

Packaging: 1 piece.

REF: 036-36-039

Scale 7758 SOEHNLE

Soehnle Weighing Platform from Germany, equipped with wheels for convenient transport. Battery-operated version, including a power adapter. Weight capacity: 200 kg, with increments of 100 g. Dimensions: $900 \times 600 \times 55$ mm. Weight: 12 kg.

Packaging: 1 unit.

REF: 036-36-069

Digital Pocket Scale 500 g, Model 9201.01, SOEHNLE

Precision digital scale, compact laboratory model, Soehnle - Professional 9201. Measuring range: 500 g. Dimensions: $110 \times 70 \times 20$ mm. Graduation: 0.1 g. LCD display. Battery-powered. Automatic shutdown feature. Unit conversion: g / oz / dwt / ozt. Platform: stainless steel.

Packaging: 1 unit.

CLINICAL BODY THERMOMETERS

REF: 252-14-005

Digital body thermometer with a flexible tip for enhanced $_{\text{AT},\text{IG}}$ safety.

Measuring range: 32.0° C to 42.9° C (89.6° F to 109.2° F) Measuring time: 1 minute Accuracy: $\pm 0.1^{\circ}$ C ($\pm 0.2^{\circ}$ F) for 35.0° C to 42.0° C (95.0° F to 107.6° F) $\pm 0.2^{\circ}$ C ($\pm 0.4^{\circ}$ F) measuring range in an environment of 22° C (71.6° F) Display: 31/2 LCD digits (display unit: 0.1° C / 0.1° F) Battery: LR41 alkaline Battery life: approximately 250 hours or 1000 measurements. Weight: 9.6g Advantages: CE certified, fever marking, waterproof case, automatic shutdown, low battery indication.

Packaging: 1 box of 12 pieces, box of 360 pieces.

REF: 252-14-004

SAFETY waterproof digital thermometer_{A.T./G}

Digital body thermometer featuring an audible alert and a waterproof head SAFETY A.T./G Measuring range: $32.0^{\circ}\text{C}-42.9^{\circ}\text{C}$ Accuracy: $\pm 0.1^{\circ}\text{C}$ for $35.5^{\circ}\text{C}-42.0^{\circ}\text{C}$ / $\pm 0.2^{\circ}\text{C}$ for temperatures below 35.5°C or above 42.0°C at a constant room temperature of 25°C Display: Liquid crystal display, $3\frac{1}{2}$ digits

Packaging: 1 box containing 12 pieces, box of 360 pieces

REF: 087-14-006

Clinical (Medical) Thermometer Free of Mercury SAFETY A.T./G

Ecological body thermometer, mercury-free, featuring a unique special case for effortless and secure zeroing of the indication. Indication achieved within 3 minutes. Rapid zeroing completed in 5 seconds (Special cap designed for easy and safe zeroing of the indication). Type: Mercury-free thermometer with a shaking mechanism. Measuring range: 35°C – 42.0°C. Accuracy: +0.10°C, -0.10°C. Lowest graduation value: 0.1°C. Liquid: a mixture of Gallium, Indium, and Tin.

Packaging: 1 box containing 12 pieces, with a total of 144 pieces per box.

REF: 741-14-009

Digital Thermometer for Children SAFETY A.T./G

Children's digital thermometer (Cartoon series: Dog, Frog, Bear, Cow). Flexible tip: Ensures comfortable use and enhanced safety. Waterproof design: Facilitates easy cleaning and disinfection. Audible signal indicates measurement completion. Fever alarm with audible notification. Memory function for last measurement. Dual measurement units (°C/°F). Rapid measurement: 10s / 20s / 30s depending on application. Automatic shutdown feature to conserve battery life. Available designs: Dog, Frog, Bear, Cow. Ideal for home or pharmacy use. Merges reliability, a child-friendly experience, and high measurement accuracy.

Packaging: 1 box of 12 pieces, box of 360 pieces.

CLINICAL INFRARED BODY THERMOMETERS

Infrared Thermometer IHEALTH

The iHealth PT3 infrared thermometer provides rapid, painless, and hygienic temperature measurement for the entire family. Utilizing infrared technology, it delivers precise non-contact body temperature readings, making it an excellent option for both children and adults. As a certified medical device, it guarantees dependable results. Measurements are not synchronized with the iHealth MyVitals application. Non-contact infrared technology is suitable for all ages, ensuring accurate and swift measurements.

Packaging: 1 box of 12 pieces, box of 144 pieces.

REF: 374-14-001 PT3

Infrared Thermometer

Model: LD-FT-100B

Dimensions and Weight: 166 x 43 x 44 mm, 90g (including batteries)

Power Source: 2 x AAA 1.5 V alkaline batteries

Displayed Temperature Range: Forehead: °C to 43 °C; Object: 0°C to 70°C

Display Resolution: 0.1 °F/0.1°C

Accuracy of Measurements for Body Function: from 35.0 °C to 42.0 °C,

 $\pm 0.3^{\circ}\text{C}$ from 32.0°C to 35.0°C and from 42.0°C to 43.0°C

Temperature Unit: °C or °F

Operating Temperature Range: 10°C to 40°C Storage Temperature Range: -20°C to 55°C Memory Capacity: 32 measurements

Packaging: 1 box of 12 pieces, box of 100 pieces

REF: 024-14-001

Infrared Thermometer Safety A.T./G

Model: AXD 515

Displayed temperature range: 35.0° C (89.6° F) - 42.9° C (109.2° F) Operating environment: 10.0° C - 40.0° C (50.0° F - 104.0° F) RH $\leq 95\%$

Atmospheric pressure: 80 - 106 kPa

Resolution: 0.1°C / 0.1°F

Display type: Backlit liquid crystal display

Auto operation: < 2 minutes

Dimensions: 136 mm x 38 mm x 33 mm

Memory: 15 records

Transport and storage conditions: -20.0°C - 55.0°C (-4.0°F - 131.0°F) RH ≤ 95%

Atmospheric pressure: 80 - 106 kPa Laboratory measurement accuracy:

TYPES OF GLOVES

Disposable HDPE Transparent SAFETY Gloves A.T./G

Disposable HDPE Transparent Safety Gloves AT/G 0.6G are exceptionally thin yet durable, ensuring that they do not compromise the user's tactile sensitivity. Their elasticity allows for unrestricted finger mobility. Constructed from high-quality polyethylene, these gloves remain securely in place during use. They have been rigorously tested for small punctures and feature a textured surface. Non-allergenic and ambidextrous, their packaging is designed for easy access, enabling users to retrieve one glove at a time. Special attention has been given during manufacturing to ensure that the glove edges open effortlessly, facilitating easy hand insertion. Thickness: 0.025 mm Packaging: box of 100 pieces, box of 10,000 pieces.

REF: 389-12-040

ROMED Polyethylene Two-Finger Gloves

Romed gynecological gloves are designed for gynecological and urological tactile examinations, as well as orthopedic digital assessments. These polyethylene gloves are non-sterile and accommodate both men and women due to their universal size. Product specifications for gynecological/urological gloves include 2-finger gloves for the index and middle fingers. Material: polyethylene, latex-free. Non-sterile. Packaging: available in boxes of 100 pieces and 10,000 pieces.

REF: 010-12-051

Gloves, Paper (Copolymer), ROMED

Copolymer gloves adhered to paper, sterile, disposable, Romed Material LDPE (Low-Density Polyethylene Line). Exhibiting high transparency, excellent insulating and mechanical properties, and devoid of any odor from the components. Packaging: box of 100 pieces, box of 2400 pieces.

This dressing offers excellent absorbency and protection against impacts. Its hypoallergenic adhesive material ensures skin compatibility. Additionally, it is breathable, lightweight, and thin, as well as radiopaque and air-permeable. It is designed for postoperative wound care and the sterile management of micro-wounds, such as in first aid situations. This dressing is particularly suitable for patients with sensitive skin.

DRESSING MATERIAL

Self-adhesive fabric tape The 7.5 cm x 5 m

Self-adhesive fabric tape is composed of 100% cotton woven fabric, providing both flexibility and durability. The zinc oxide-based adhesive guarantees robust and enduring adhesion to the skin, without leaving any residue upon removal. Its unique construction renders it resistant to water, sweat, and humidity, making it particularly suitable for medical applications. Furthermore, it can be easily torn both lengthwise and widthwise, simplifying its application. The tape's radiopacity allows for its use without necessitating removal during X-ray procedures. Packaging: 6 pieces, 192 pieces per box.

REF: 729-15-075

Biopap RAYS Adhesive Tape

Biopap adhesive fixation tape by Rays Italy is designed for the secure fixation and stabilization of plasters and bandages. It is ideal for situations necessitating frequent dressing changes. This tape is biocompatible, exceptionally skin-friendly, exhibits strong adhesion, leaves no residue upon removal, and can be easily cut by hand.
